

Project Fact Sheet #29

Project Name: High Point Road Node

Cost: \$352,000 [programmed Isakson HPP / GW078A / 3406]

Detailed Description and Justification: In an attempt to create an identity for the Evermore CID Corridor, this project features a formal hard-scaped pedestrian plaza, a sculptural identifying element and a paved link from a plaza to future development. Color materials for the proposed project are included in the custom banners, light poles, plant materials, specialty pavers and site furnishings.

Service Type: Community Character

Sponsor: CID/Federal

Jurisdiction: Gwinnett County

Target Completion Date: 2009 [PBS&J consultant]

Corridor Length: not applicable

The image contains a site plan on the left and three photographs on the right. The site plan shows the intersection of High Point Road and US HWY 78. It features three 'Node Sculpture' locations, a 'Link to Future Development' indicated by an arrow, and a paved link from a plaza to future development. A scale bar and north arrow are at the bottom left. The photographs show 'EXISTING CONDITIONS' at the intersection, including a gas station, a utility pole, and a street view.
